Professional Summary

Dedicated and detail-oriented professional with 4.6+ years of experience in DevOps, Cloud Computing, and Automation. AWS Certified Solution Architect Associate with a proven track record of designing and implementing scalable and reliable cloud solutions.

Skills

Cloud & Infrastructure: AWS (Amazon Web Services), EC2, RDS, S3, VPC, Route 53, ACM, CloudFront, Elastic Load Balancer (ELB), IAM, ECR, Security Groups, AWS API Gateway, AWS CloudWatch, AWS Secrets Manager, AWS Inspector, AWS Security Hub, AWS Guard Duty.
DevOps & CI/CD Tools: Jenkins, GitHub Actions, ArgoCD, JFrog Artifactory, Git, GitHub Gradle, Maven
Containerization & Orchestration: Docker, Kubernetes
Infrastructure as Code: Terraform
Monitoring, Observability & Incident Management: Prometheus, Grafana, Grafana Incident, ELK Stack (Elasticsearch, Logstash, Kibana), New Relic, AppDynamics, Zabbix, PRTG, AlertSite, Opsgenie
Operating Systems: Linux

Experience

Persistent Systems	August 2024 - Present
Lead Software Engineer	Noida, Uttar Pradesh
- Designed and maintained CI/CD pipelines using Jenkins, enabling automated build, test, and deployment workflows; integrated ArgoCD for GitOps-based deployments, improving release consistency and reducing manual intervention. - Managed production-grade Kubernetes clusters, including workload deployments, namespace governance, resource allocation, and cluster troubleshooting; implemented scalability, high availability, and resource optimization strategies to support large-scale microservices architectures. - Implemented cluster observability and monitoring by tracking infrastructure metrics, logs, and system health using monitoring tools, enabling proactive detection, troubleshooting, and resolution of production issues. - Delivered 24/7 on-call support for mission-critical infrastructure serving 100M+ users, performing rapid incident response, coordinating cross-team resolution, and conducting Root Cause Analysis (RCA) to improve platform reliability and prevent recurring incidents. - Administered GitHub Enterprise, Jira, and Confluence Data Center environments for ~30,000 organizational users, ensuring platform stability, access management, system upgrades, and seamless collaboration across engineering teams.	
Payomatix Technologies	April 2024 - July 2025
System Support Engineer	Greater Noida, Uttar Pradesh
- Collaborated with engineering and SRE teams to diagnose and resolve production issues, streamline release cycles, and improve application uptime and platform stability. - Built and maintained observability pipelines using Prometheus, Grafana, and ELK Stack, enabling real-time monitoring, log aggregation, alerting, and faster root cause identification. - Improved cloud security posture by implementing IAM role-based access control (RBAC), secure key management, and vulnerability scanning, ensuring compliance with infrastructure security standards.	
Avani Ecocare	Jan 2024 - April 2024
Freelance - DevOps Engineer	Noida, Uttar Pradesh
Codewalla Software Development	July 2022 - December 2023
Jr. DevOps Engineer	Pune, Maharashtra
Purchasing Power LLC	Sept 2021- May 2022
Site Ops Engineer - Intern	Chennai, Tamil Nadu

Certification

- AWS Certified Solutions Architect Associate AWS (SJKTM65KXFB4Q2CM)
